

# JAVA DEVELOPER

123 Your Address  
City, State, Zip Code  
(xxx)-xxx-xxxx  
your.email@gmail.com

*Technically advanced Java Developer with 7+ years of experience in designing, developing and delivering user-centric software applications using Java/J2EE technologies. Offering strong expertise in multiple programming languages, including JavaScript, HTML, and XML. Seeking to secure a challenging position as a Java Developer.*

## PROFESSIONAL EXPERIENCE

---

### IT AMERICA INC., Arizona City, AZ

Java Developer, September 2015 – Present

- Use Java/J2EE technologies to develop web applications for client server environments and add functionalities to existing applications.
- Revamp various Java applications developed with Spring, Hibernate and older J2EE.
- Conduct user requirements analysis to design and program applications and deliver support for system enhancement.
- Play a pivotal role as a part of an agile scrum team accountable, developing new applications using Spring framework backend and Angular.js frontend.
- Consult with customers on project status and technical concerns.

### INFOSYS, Charlotte, NC

Java Developer, June 2011 – August 2015

- Rendered solid technical expertise in Software Development Life Cycle and core Java technologies to develop applications based on specific client requirements.
- Developed highly interactive and customized UIs using JavaScript, HTML, JSP, and CSS to improve functionality of web applications.
- Performed unit testing of applications by developing and applying test cases in JUnit.
- Enhanced the quality of code and improved application performance, leading to a 14% reduction in bugs.
- Created interactive UIs that surpassed client objectives and improved user experience.
